A very fair audience assembled at Washington Hall last evening to hear Bret Harte lecture on the "Argonauts of Mr. Harte was introduced by Hon. R. H. Cochran and took his position at the reading desk arranged for him in the niddle of the stage, a handsome, dark naired gentleman, graceful in form and carriage, and apparently about thirty-five years of age. The lecture was de-livered in a pleasant voice and with an sgreeable though somewhat languid man-

pisode of American life, as quaint and cpisode of American life, as quant and typical as that of the early Greek adventurers—whose name I have borrowed for its title—a kind of crusade without a cross, an exodus without a prophet. It is not a pretty story; I do not know that it is strictly true. It is of a life of which creshers the best that can be said is that

For centuries the old freebooters had cruised along its shores and plundered the Philippine galleons. Sir Francis Drake lay for-six weeks on the coast. Only within ten years a band of gold diggers came upon a large piece of wax in the broken ribs of a rotten ship. California was at once fired with the discovery, and in a few weeks hundreds were scarching the ruins for the lost treasure of the Philippine galleon. At lest they found a few cutlasses with the Queen's broad arrow on their plates, which only showed that the enter prising and gallant Francis Drake had been there before them.

prising and gallant Francis Drake had been there before them.

These were peaceful pastoral days for California. There were happy, tranquil days in which the soit-handed Latins lolled in the shade and enjoyed their ease, and imagined they had found a new -pain; and the Indian neophytes dressed nearly, but not expensively, in mud.

But in time a political and social earthquake more powerful than any convulsion ever knew, shook the foundation of the land, and in the disrupted strats of the earth the favorite treasure glittered before their eyes. Then a change came upon them suddenly, which had been strengthened by a chain of circumstances. It was not the finding of a few grains of gold by a laborer at Suller's mill; but for years the way had been slowly opening and the doors unlocked for the people who were to profit by the discovery. The real pioneers of the great change were a Catholic Missionary and Brigham Young. Salt Lake City was an oasia in which the weary travelers across the Plains could rest and refresh themselves, and made silt the subsequent grand achievements possit. rest and refresh themselves, and made al the subsequent grand achievements possi

The Argonauts, drawn to the Great West by the discovery of gold, were a lawless, irreligious band of men. They were given to no superstitious rites, enthused by no high ambition, and skeptical even of the existence of the golden fleece until they saw it. Embarked in an adventure, they accepted, with a kind of calm philosophy, whatever it might bring. "If there is no gold, what are you going to do with those sluice-boxes?" said a newly arrived fortune seeker to his friend. "They will make first class coffriend. "They will make first class cofriend.

said a newly arrived brither seaser to als friend. "They will make first class colfins," was the reply of a man who had calculated all the chances. If they did not burn their vessels behind them, they at least left the good ship Argo to lie idle at the wharf. The sailors were shipped only for the outward voyage. Nobody expected to return, even it he anticipated failure. An Argonaut thought he recognized in the boatman who pulled him sabore and charged him the modest sum of fifty dollars for the favor, a brother classmate of Oxford. "Were you not," he asked, "senior wrangler in the class of 1843?" "Yes," said the other significantly, "but I was also stroke oar in the respectation. "Perhaps from the absence of female society men clung more closely to each other. To be a man's partner meant to be loved and defended by him; and some men were true even to the memory of a dead partner."

The lecturer dwelt on the peculiar ex-pressions used by the miders. They were no sentimentalists. Their language illus-trated the earnestness and directness and

This same tendency to epigram and sarcasm had made the map of California ghastly with unhallowed christenings, such as "Murderers' Bend," "Dead Broke"

perhaps the best that can be said is, that it exists no longer.

Let me first give you an idea of the country which these people recreated; of the civilization they displaced. For more than three hundred years California was praising him for his industry and devotion to his own country, and rather complimenting him on his easy acquisition of the miners' vices at a time when Chinese faults were the very worst of faults, and when a white man's fault was a Chinaman's crime. He rather thought the Chinese had got even with us, however. They had reduced the smuggling of opi-

um in bamboo chairs to a nicety, victimized us in the medical line, and taken us in in a thousand different ways. Mr. Harte concluded:
"With this receding figure (the Chine man) bringing up the rear of the proces-aion, I close my review of the Argonauts of '4. In the rank and file there may be of 4. In the rank and file there may be some personally known to many in this audience. There may be gaps which the memory of others can supply.
